Wissensgesellschaft im asiatisch-pazifischen Raum Knowledge society in the Asia Pacific

Diese Auswahlbibliographie enthält Literatur seit ca. dem Jahre 2000. Sämtliche Titel entstammen der Datenbank des „[Fachinformationsverbundes Internationale Beziehungen und Länderkunde](#)“ (FIV-IBLK). Die Titel sind nach Erscheinungsdatum geordnet. Zur Aufschlüsselung der Bibliothekssigel benutzen Sie bitte die [Sigelliste](#), die Sie ebenfalls auf dieser Website finden.

This selected bibliography presents literature since ca. year 2000. The bibliography is an excerpt from the database of the „[Specialized Information Network International Relations and Area Studies](#)“ (FIV-IBLK). The titles are arranged by date of publication. A list decoding the [library codes](#) can also be found on this website.

„Im Gegensatz zum technizistischen Begriff der Informationsgesellschaft eröffnet „Wissensgesellschaft“ eine Perspektive, die auf den Willen und die Befähigung der Menschen zu Selbstbestimmung setzt.

Nicht Rechnerleistungen und Miniaturisierung werden die Qualität der künftigen gesellschaftlichen Entwicklung bestimmen. Entscheidend wird die Auswahl des Nützlichen und die Fähigkeit zum Aushalten von Ambivalenzen und Unsicherheit sein, die Gestaltung des Zugangs zu Wissen und der fehlerfreundliche Umgang mit dem Nichtwissen.“
(Heinrich-Böll-Stiftung; <http://www.wissensgesellschaft.org/>)

Gliederung:

- 1 Wissensgesellschaft: Allgemeine Betrachtungen
- 2 Bildung im asiatisch-pazifischen Raum: Grundlage des Wissens
 - 2.1 Zur Bildungsstruktur: Einige Länderbeispiele
 - 2.2 Hochschulbildung im asiatisch-pazifischen Raum
 - 2.3 Zur Hochschulbildung: Einige Länderbeispiele
- 3 Wissen als menschliche Ressource im asiatisch-pazifischen Raum
 - 3.1 Indigenes und traditionelles Wissen
 - 3.2 Wissen und Gender
- 4 Die wissensbasierte Wirtschaft im asiatisch-pazifischen Raum
 - 4.1 Japan
 - 4.2 Volksrepublik China/Taiwan
 - 4.3 Südkorea

- 4.4 Singapur
- 4.5 Malaysia/Thailand/Vietnam
- 5 Migration des Wissens und Brain Drain im asiatisch-pazifischen Raum
- 6 Wissen als geistiges Eigentum im asiatisch-pazifischen Raum
 - 6.1 Geistiges Eigentum: Einige Länderbeispiele

Structure:

- 1 Knowledge society: General considerations
- 2 Education in the Asia Pacific: The basis of knowledge
 - 2.1 Educational structure: Some country experiences
 - 2.2 Higher education in the Asia Pacific
 - 2.3 Higher education: Some country experiences
- 3 Knowledge as human resource in the Asia Pacific
 - 3.1 Indigenous and traditional knowledge
 - 3.2 Knowledge and gender
- 4 The knowledge-based economy in the Asia Pacific
 - 4.1 Japan
 - 4.2 People's Republic of China/Taiwan
 - 4.3 South Korea
 - 4.4 Singapore
 - 4.5 Malaysia/Thailand/Vietnam
- 5 Migration of knowledge and brain drain in the Asia Pacific
- 6 Knowledge as intellectual property in the Asia Pacific
 - 6.1 Intellectual property: Some country experiences

Asien + Pazifischer Raum + Identität + Regionalisierung + Regionale internationale Prozesse und Tendenzen + Weltwirtschaftliche Verflechtung/ Globalisierung + Globalisierung internationaler Beziehungen + Schulerziehung/ Schulbildung + Bildungsreform + Transnational + Japan + Australien + Malaysia + Singapur

Asia + Pacific region + Identity + Regionalization + Regional international processes and tendencies + Global economic interdependence/ globalization + Globalization of international relations + School education + Education reforms + Transnational + Japan + Australia + Malaysia + Singapore

This essay examines a resurgent interest in "regionness" as a response to globalization, and it looks at how governments and citizens have participated in the discourse on forging a new Asia-Pacific community that has developed over the past fifteen years. Part one distinguishes between "regionalization" and "regionalism" as competing visions for the construction of a future Asia-Pacific community. Regionalization, the dominant paradigm during the postcolonial period, centers on interstate forums dominated by officially recognized political and economic elites who seek interstate cooperation in order to protect state interests, state power, and national identity from foreign as well as domestic challenges. Regionalism, as an alternative paradigm, envisions the creation of transnational networks inclusive of nonofficial actors, whose identification with a particular state and set of national interests does not preclude the creation of a regional identity (or identities) and support for regional interests. Part two considers the challenges that regionalism poses for the nation-state and its leadership. It does so by highlighting the pressure for reform that globalization has brought to bear upon one particular institution that theorists of nationalism have long identified as central to the perpetuation of national identity, national unity, and state authority: schooling. Part three assesses the current prospects for such reforms by briefly examining recent educational developments in Japan, Australia, Malaysia, and Singapore. (Crit Asian Stud/DÜI)

Behrman, Jere R.

The role of decentralization in promoting effective schooling in developing Asia / Jere R. Behrman, Anil B. Deolalikar, and Lee-Ying Soon

in: Asian Development Review (Manila). 20 (2003) 1, S. 57-99 : Tab., Lit. S. 95-99

Asien + Entwicklungsländer + Dezentralisierung + Bildung/ Erziehung + Dezentrale Planung + Öffentliche Finanzpolitik + Schulpolitik + Primarschule + Sekundarschule + Curriculum + Schule + Leistungsmessung

Asia + Developing countries + Decentralization + Education + Decentralized planning + Public financial policy + Schools policy + Primary schools + Secondary schools + Curricula (education) + Schools + Performance measurement

While decentralization of schooling in Asian developing countries has largely been driven by fiscal constraints, it has also been motivated by concerns about the effectiveness of a centralized system in delivering schooling services. The statistics are revealing about some of these concerns: while virtually all of these countries have made impressive gains in expanding the coverage of primary schooling, enrollment rates remain generally low at secondary and tertiary levels, particularly for children coming from disadvantaged backgrounds. The quality of schooling is also a cause for concern, judging by dropout and grade repetition rates, and international comparisons of achievement test scores. Another cause for concern is whether the curricula used are appropriate, especially for higher schooling levels. (Asian Dev Rev/DÜI)

groups + Minority groups + Intrastate conflicts + Ethnic conflicts +
Interfaith relations + Religious conflicts

The expansion of public education is often seen as an effective tool for the
promotion of national identity and the mitigation of ethno-religious tensions
in diverse post-colonial states. This essay questions such assumptions via
an examination of successive Philippine governments' efforts to deploy
educational policy as a response to chronic tensions between the nation's
Christianised mainstream and a restive Muslim minority on the southern island
of Mindanao. It suggests that the expansion of education to foster a cohesive
national identity without careful reconsideration of the religious, cultural and
political biases inherent in its content is likely to fail in achieving peaceful,
cohesive relations between different ethno-religious communities in religiously
diverse multicultural states. (J Southeast Asian Stud/DÜI)

South Korea + Education + Education policy + Social inequality +
Social strata + Social background + Educational systems + Development
perspectives and tendencies

This paper analyzes how and to what extent inequalities in educational
opportunity in Korea have changed during the second half of the twentieth
century. Educational inequality is defined by social class differentials in both
the quantity (success) and quality (path) of school transitions made at the
secondary (middle to high school) and tertiary (college) levels of schooling.
The extent of educational stratification as examined by the probability of
transition to a higher grade has not been visibly alleviated over multiple
generations. We also find that the extent of educational stratification is stronger
in the secondary levels than in the tertiary schooling transition. The results
also show that the long-term trend of stratification in the Korean educational
system has decreased inequality in terms of scale, but increased the qualitative
inequality of educational achievement between social classes. Even during
the period of educational expansion and rapid economic development, social
inequality in educational opportunity has resisted change. Such inequalities
tend to reproduce themselves between successive cohorts, especially when
quantitative socioeconomic opportunity remains limited. (Korea J/DÜI)

Honda, Yuki

The formation and transformation of the Japanese system of
transition from school to work / Honda Yuki

in: Social Science Japan Journal (Oxford). 7 (2004) 1,
S. 103-115 : Tab., Lit.Hinw.

Japan + Bildungssystem + Bildung/ Erziehung + Arbeitsmarkt +
Beschäftigung

Japan + Educational systems + Education + Labour market + Employment

The Japanese system of transition from school to work has attracted much
attention abroad and has often been praised for its efficiency. The reality
of both its formation in the past and its transformation at present, however,
seems not to be reported accurately in other countries. This examination of the
processes of the formation and transformation of the Japanese transition system
will demonstrate that the apparent efficiency of the system has been the product
of several historical factors. Moreover, the drawbacks of this system are
becoming increasingly apparent amid the recent, drastic changes in Japanese
society. The aim of this paper is to describe the process of formation in the
1960s and the subsequent transformation in the 1990s of the Japanese system
of transition from school to work in order to reveal the limits of its supposed

efficiency. (SSJJ/DÜI)

Japan + Rural areas + Life-long learning + Adult education + Out of school education + Education + Adult education establishments + Leisure activities + Professional/ specialized qualification + Life style/ way of life

This paper examines lifelong learning in contemporary Japan, considering first various conceptual, policy and practical aspects before contextualizing the reality of the relevance, focus and sustainability of lifelong learning in a rural Japanese setting by detailing lifelong learning as directed by Aomori Prefecture, Hirosaki University and in a special program of Hirosaki City. On the basis of this contextualization, the paper concludes by proposing that the lifelong learning sector that is emerging in Japan can be organized on the basis of four overlapping orientations: one based on personal interest for the "hobbyist" as lifelong learner, a second based on the lifestyle and contemporary issues concerns of the "resident" as lifelong learner, a third through meeting the knowledge and skills needs of the "careerist" as lifelong learner and the fourth through a specialized themes curriculum for the "activist" as lifelong learner. Education reforms + School/ school systems + Schools policy + Primary
education + Primary schools + Information society

Im Rahmen des Artikels soll die Realisierung der genannten Reformziele bis
zum Jahr 2000 anhand von offiziellem statistischen Material kritisch überprüft
werden: Wie weit ist die Regierung bei der Verwirklichung ihrer Ziele bisher
gekommen und welche Probleme existieren weiterhin oder haben sich sogar
erst aus den Reformen ergeben? Wo gibt es Fortschritte oder vielleicht
Rückschritte, welche Hindernisse bestehen noch? Wenn die offiziellen Zahlen
auch nur Tendenzen widerspiegeln können und ihre Verlässlichkeit kaum zu
überprüfen ist, so dürften sie doch Aufschluss über den Stand der Reformen
im Pflichtschulbereich geben. Ausgehend davon sollen dann abschließend eine
Bewertung des bisherigen Beitrags der Grundbildung bei der Etablierung einer
modernen Wissensgesellschaft und ein kurzer Ausblick auf die Maßnahmen
gegeben werden, die zur Lösung bestehender Probleme ergriffen werden
können oder die bereits ergriffen wurden. (China aktuell/DÜT)

Trends in income disparity and equality enhancing (?)
education policies in the development stages of Singapore

in: International Journal of Educational Development (Oxford).
23 (2003) 1, S. 37-56 : Tab., Lit. S. 56

Singapur + Bildungspolitik + Einkommensverteilung + Soziale
Ungleichheit + Internationale Migration + Human Resources Management

Singapore + Education policy + Income distribution + Social inequality +
International migration + Human Resources Management

The paper examines the trends in income diversity in Singapore at the total and
disaggregated level using Labour Force Survey data. The income inequality
in Singapore is found to be significantly high. One reason is the selective
migration policy of the government of Singapore. The government has made
conscious efforts to bring equality in educational opportunity through various
policies. This paper examines the effectiveness of these policies. It was found
that the academic ability of children is not uniformly represented across
different parental educational background groups, with students from favoured
backgrounds being increasingly represented in the top strata of every cohort.

Wong Ting-hong

Rethinking the education/state formation connection : Pedagogic reform in Singapore, 1945-1965 / Ting-Hong Wong ; Michael Apple

in: Comparative Education Review (Chicago/Ill.). 46 (2002) 2, S. 182-210

Singapur + Nationen- und Staatenbildung + Bildung/ Erziehung + Kulturelle Identität + Schulreform + Curriculum
Singapore + Nation and state building + Education + Cultural identity + School reforms + Curricula (education)

By employing and expanding Bernstein's concept of pedagogic device, the authors attempted to strengthen the theory of state formation and education by emphasizing the relative autonomy of the school system. The major contention is that the educational field has its own rules, practices, and social relations that are not necessarily reducible to the status of "dependent variable". Because of the specific conjunctural configuration of the educational system, schools may at times generate profound effects that may block or modify the process of state building. (DSE/DÜI)

Education in general, and specifically higher education, plays an important role in the development process of all nations. Institutions of higher education have an important responsibility to support knowledge-driven economic growth strategies. This paper investigates the strategies of how by applying

technologies on a large scale-with close attention to quality-virtual education can help higher education to find a way through the crisis of access, prohibitive cost, and lack of flexibility that we find all over the developing world. By addressing various issues related to planning, implementation, and quality with proper strategies, virtual education can provide immense opportunity to reduce the North-South knowledge gap and also to promote the development of the developing world. This paper reviews various issues related to promotion and quality control in virtual higher education and addresses possible strategies with general considerations of Africa and Asia. The Malaysian government regards highly skilled human capital as the nucleus of a knowledge-based economy and has been attempting to reform higher-educational policies in both the public and private sectors since the mid-1990s. The research reported here seeks to evaluate higher-educational policy reform as it relates to the development of human resources in an era of information and communication technologies (ICT). This research has three goals: first, to determine how Malaysian higher-educational policies have changed by looking at socioeconomic backgrounds; second, to examine case studies of the Malaysia Multimedia University (MMU), Malaysia National University (UKM), and University Malaysia Sarawak (Unimas); and third, to discuss whether ICT is affecting access and course selection in higher education in terms of gender equality. The analysis reported here concludes that the

new challenges facing Malaysia offer possibilities not only for bridging the digital divide, in some aspects, nationally, but also for Malaysia to emerge as fundamental to a South-South Corporation and as a Center of Excellence internationally. It will be pointed out how, and to what extent, the government of Malaysia should reconceptualize the Malaysia Super Corridor project (MSC) in order to become a fully developed nation, equipped as a knowledge society. Policy of decentralization and changing governance of higher education in post-Mao China

in: Public Administration and Development (Chichester). 22 (2002) 3, S. 261-273

Volksrepublik China + Dezentralisierung + Schulpolitik + Hochschulsystem + Bildungspolitik + Bildungsreform

Peoples Republic of China + Decentralization + Schools policy + Higher education system + Education policy + Education reforms

The article examines how the policy of decentralization has affected the governance modes of higher education in Mainland China. It focuses on financing, provision and regulation in education, with special attention given to examining the changing relations delivery. One very significant consequence of the change is that the public-good functions of education, of which the state has taken the primary role of a reliable guarantor, have diminished. Nonetheless, the state's role as a regulator and overall service coordinator has been strengthened rather than weakened under the policy of decentralization. (DSE/DÜI)

Peoples Republic of China + Internationalization + Education + Human capital + International scientific-technological cooperation + Global economic interdependence/ globalization + Academics/ researchers + Foreign direct investments + Technology transfer

As societies internationalize, the demand for, and the value of, various goods and services increase. Individuals who possess new ideas, technologies and information that abets globalization become imbued with "transnational human capital", making them more valuable to these societies. This report looks at this issue from five perspectives. First, it shows that China's education and employment system is now highly internationalized. Secondly, since even Chinese scholars sent by the government rely heavily on foreign funds to complete their studies, China is benefiting from foreign capital invested in the cohort of returnees. Thirdly, the report shows that foreign PhDs are worth more than domestic PhDs in terms of people's perceptions, technology transfer and in their ability to bring benefits to their universities. Finally, returnees in high tech zones, compared to people in the zones who had not been overseas, were more likely to be importing technology and capital, to feel that their skills were in great demand within society, and to be using that technology to target the domestic market. Strengthening China through science and education : China's development strategy toward the twenty-first century
in: Issues and Studies (Taipei). 38 (September 2002) 3, S. 122-149 : Tab., Lit. Hinw.

Volksrepublik China + Bildung/ Erziehung + Wissenschaften + Forschung + Technologie + Bildungspolitik + Forschungs- und Wissenschaftspolitik + Technologiepolitik + Politisches Programm + Politische Ziele + Wirtschaftliche Entwicklung + Technologische Entwicklung

Bildungsfinanzierung + Bildungsreform + Innovation + HighTech + Industriepolitik + Forschungsförderung/ Forschungsfinanzierung

Peoples Republic of China + Education + Sciences + Research + Technological science + Education policy + Science and research policy + Technology policy + Political programmes + Political goals + Economic development + Technological development

Education finance + Education reforms + Innovation + HighTech + Industrial policy + Research support/ research funding

The paper reviews the background against which the strategy of "revitalizing the nation through science, technology, and education" (kejiao xingguo) was put forward, related major national programs, and progress, problems, and prospects of China's science, technology, and education at the turn of the twenty-first century. With support from the Party leadership and the government, China during the past seven years has increased her funding for research and education, and implemented major programs that would elevate the country's standards in science and education. However, the nation is still facing challenges of insufficient funding, lack of high-quality researchers, weak industrial research and development (R and D) and high-tech capabilities, and lower research quality. Pursuing quick returns and short-term interests will only result in the stagnation of China as a second-tier science, technology, and education country for a long time to come. (Issues Stud/DÜI)

Ashton, David

Explaining change in national HRD strategies : The case of three Asian Tigers

in: The European Journal of Development Research (Ilford). 14 (2002) 1, S. 126-144

Singapur + Taiwan + Südkorea + Humankapital + Beschäftigungspolitik + Wirtschaftspolitik + Bildungsökonomie

Singapore + Taiwan + South Korea + Human capital + Employment policy + Economic policy + Education economics

In this article the authors argue that changes in the national human resource development policies of the three "Tiger" economies of Singapore, Taiwan and S. Korea, are best explained by internal changes in the relationship between the state, capital and labour, rather than the impact of external factors. External factors are not without influence but of the two external sources of change operating at the international level, it is the underlying changes in the market that are more important than the actions of international agencies, such as the IMF, in explaining the incremental changes which can be observed in national human resource development strategies. Asia + Information and communication technology + Employment + Poverty + Education + Developing countries + Rural development + Economic growth + Development policy strategies + Development through modernization

The paper addresses the question of how the new information and communication technologies (ICTs) can potentially help reduce poverty in developing countries. Starting with the definition and types of ICTs, the paper discusses a number of instances where various ICTs have been fruitfully applied to improve the welfare of rural people in a number of developing economies. The paper also reviews how ICTs can be an indirect instrument of poverty reduction through their impact on growth. Finally the paper discusses the various factors that influence the adoption of new ICTs and the policies developing countries can adopt to take advantage of the new ICT revolution. Human resource competitiveness and inflow of foreign direct investment to the ASEAN region / Ishak Yussof ; Rahmah Ismail

in: Asia-Pacific Development Journal (Bangkok). 9 (2002) 1, S. 89-107

ASEAN-Länder + Myanmar + Thailand + Indonesien + Philippinen + Singapur + Direktinvestition + Wettbewerbsfähigkeit + Faktorkosten + Arbeit + Produktivität + Bildungsniveau/ Ausbildungsstand + Humankapital

ASEAN countries + Myanmar + Thailand + Indonesia + Philippines + Singapore + Foreign direct investments + Competitiveness + Factor costs + Work + Productivity + Education level + Human capital

Theoretically foreign investors are likely to invest in countries where competitiveness indicators such as human resource capability resource endowment, market opportunities and per capita incomes are high. This paper attempts to compare human resource competitiveness indicators such as labour costs and productivity, educational achievements, number of skilled workers, skill composition and technological progress in four selected ASEAN countries Malaysia, Thailand, Indonesia and the Philippines with developed countries in the region, such as Singapore, and to compare them to trends in FDI inflows. The analysis is based on data for the period 1985 to 2000, (A-P Dev Journ/ DÜI)

Durch die offizielle Erweiterung des Lore Lindu Nationalparks 1993 wurde die fortgesetzte Nutzung natürlichen Ressourcen des Parks illegal und Zuwiderhandlungen mit Sanktionen belegt. Für Toro, einem kleinen Dorf am westlichen Rand des Nationalparks bedeutete dies einen tiefen Einschnitt in Bezug auf die materielle Absicherung der lokalen Bevölkerung. Ein von der Asian Development Bank (ADB) seit 1999 finanziertes Projekt der Entwicklungszusammenarbeit (CSIADCP, Central Sulawesi Intergrated Area Development and Conservation Project) sollte durch eine Diversifizierung der wirtschaftlichen Grundlagen, durch Verbesserung der infrastrukturellen Komponenten und dem Aufbau einer ökotouristischen Infrastruktur einen Ausgleich schaffen. Eigeninitiative, good governance, der Aufbau lokaler Institutionen und die Integration externer und interner Entwicklungsimpulse in lokale Strukturen, zeigt in Toro ein größeres Bewusstsein bezüglich der nachhaltigen Nutzung von natürlichen Ressourcen. Hybrid histories and indigenous knowledge among Asian rubber smallholders

in: International Social Science Journal (Oxford). 54 (2002) 3/173, S. 349-359

Indonesien + Südostasien + Erfahrungswissen + Wissensstand + Traditionelle Techniken + Agrartechnik + Kautschuk + Kleinbauer + Autochthone

Indonesia + South East Asia + Empirical knowledge + State of the art + Traditional technologies + Agricultural engineering + Rubber + Small farmers + Indigenous peoples

This article questions the premises of the concept of "indigenous knowledge", based on a case study of a seemingly exemplary system of indigenous knowledge, contemporary small-holder rubber cultivation in South-East Asia. The analysis begins with a summary of the historical development of the technology of rubber cultivation, focusing on the transplanting of Para rubber from South America to South-East Asia and the construction of knowledge of rubber cultivation both during and following this transplanting. This history of knowledge construction was characterised by two critical discontinuities, involving the separation of the rubber plant from its original conceptual context, and extensive experimentation with rubber production technologies. Zum gesellschaftlichen Umgang mit (Lokal-)Wissen auf den Cookinseln, Polynesien

in: Entwicklungsethnologie (Saarbrücken). 11 (2002) 1, S. 13-33

Cook-Inseln + Polynesien + Erfahrungswissen + Wissensstand + Verbreitung von Wissen + Lokal + Bevölkerung + Traditionelle Kultur + Landwirtschaft + Agrarwissenschaften + Entwicklungsprojekt + Interkulturelle Kommunikation

Cook Islands + Polynesia + Empirical knowledge + State of the art + Spread of knowledge + Local + Population + Traditional culture + Agriculture + Agronomy + Development projects + Intercultural communication

Der Artikel behandelt die Thematik der Handlungsrelevanz und der Distribution von lokalem Wissen im agrarischen Bereich am Beispiel der Cookinseln. Da lokales Wissen nicht allein auf sogenanntes "traditionelles" Wissen reduzierbar ist, muss auch "modernes" Wissen unter den gleichen Bedingungen und Fragestellungen betrachtet werden, wenn es im Verständnis der jeweiligen Gruppe diese Trennung gibt. Der gesellschaftliche Umgang mit Wissen innerhalb einer Gesellschaft ist kulturell verankert und daher von Gesellschaft zu Gesellschaft unterschiedlich. Externe Berater haben darauf nur wenig Einfluss. Die Erforschung und Berücksichtigung dieses Umgangs mit Wissen innerhalb seines kulturellen Kontexts erweist sich damit als mitentscheidend für den Erfolg eines Projektes aus der Entwicklungszusammenarbeit. The post UNCED era is associated with debates on how the pursuit of developed and industrialised economies by developing countries has not worked as expected. Consequently, there are serious questions on the direction human development should take and the options that are available. Most developing countries are considering alternative development approaches that take stock of the change people have introduced and the measures to correct the mistakes caused. In developing countries such as Fiji, indigenous knowledge was ignored, abandoned, and modernised during the colonial and early independence era. It is only in recent years that the value and relevance of indigenous knowledge has been acknowledged. (Int Soc Science J/DÜI)

role models + State of the art + Empirical knowledge

Differential treatment of sons and daughters by parents is a potential
explanation of the gender gap in education in developing countries. This
study empirically tests this explanation for India using household survey data

collected in urban Uttar Pradesh in 1995. The gender difference in educational
attainment is decomposed into the part that is explained by men and women's
differential characteristics and the part that is not so explained (the conventional
"discrimination" component). The analysis suggests that girls face significantly
different treatment in the infra-household allocation of education - there is
a large unexplained component in the gender gap in schooling attainment.

State of the art

This article investigates hypotheses regarding the impact of gender on
educational attainment during the spread of mass education. The connections
between gender and specific dimensions of the educational attainment process
are analysed, such as enrollment and drop-out rates, at the onset of universal
education. Second the hypotheses regarding the impact of social changes at the
community (i.e., local) level on individual educational attainment is tested.
These hypotheses predict that macro-level changes in educational, employment,
and consumption opportunities will increase school attendance. (InWent/DÜI)

Development indicators

In the recent past, there have been a number of new initiatives to improve the
access to primary education in many developing countries. Such initiatives,
which came from the public, private and non-governmental (NGO) sectors have
resulted in improved performance in various efficiency indicators. This paper
reports results from nationwide study in Bangladesh on the levels and changes
in enrolment pattern of children at the primary level. (DSE/DÜI)

Construction of Third World women's knowledge in the development discourse

in: International Social Science Journal (Oxford). 54 (2002) 3/173, S. 313-321

Indien + Kumaun + Entwicklungsländer + Frauen + Erfahrungswissen + Traditionelle Kultur + Autochthone + Gender-Ansatz

India + Kumaun + Developing countries + Women + Empirical knowledge + Traditional culture + Indigenous peoples + gender approach

Despite the vast literature that questions the separation between indigenous and scientific knowledge, rural Third World women continue to be indigenised and their knowledge upheld as the new path to sustainable development and biodiversity. By drawing on ethnographic examples from Kumaon Himalayas in India, this paper examines the construction of women's knowledge and asks how, in practice, women's knowledge is produced, circulated, and shared. It draws attention to the politics of knowledge and argues that women's knowledge is a product of everyday practices of labour and livelihood which are shaped by culturally contingent relations of power and authority. South East Asia + East Asia + Research and development + Knowledge-based economy + International + Effects/ consequences + Productivity + Increase/ expansion + Economic development + International trade + Hong Kong + Indonesia + South Korea + Malaysia + Philippines + Singapore + Thailand

OECD countries

The purpose of this article is to empirically investigate how the Research and Development (R and D) capital formation in developed countries affects the productivity of East Asian economies. Using a data set of seven East Asian economies (Hong Kong, Indonesia, Korea, Malaysia, the Philippines, Singapore, and Thailand), it is found that the international R and D spillovers from the Organisation for Economic Co-operation and Development (OECD) countries promote the total factor productivity (TFP) of sample economies. Moreover, the results show that the international R and D spillovers correlate with international trade, particularly with manufacturing goods imports. It follows from these results that the process of economic growth in East Asian economies has accompanied the international R and D spillovers through

international trade expansion. (DSE/DÜI)

Volksrepublik China + Facharbeitskräfte + Ausbildung/ Berufliche Bildung + Bildungsweg/ Ausbildungsweg + Wirtschaftsunternehmen + Betriebliche Ausbildung/ Lehre + Einrichtung der beruflichen Fortbildung + Berufsbildung + Arbeitskräfte + Arbeiter + Direktinvestition + Privatwirtschaft + Informeller Sektor

Peoples Republic of China + Skilled workers + Professional/ vocational education + Routes to education + Enterprises + Apprenticeships + Further professional/ vocational training establishments + Further professional/ vocational training + Manpower + Workers + Foreign direct investments + Private sector + Informal sector

The training provision and skill level of the labour force of a nation has been widely regarded as essential to organizational and national performance in an era of accelerating global competition. China, with one of the largest labour forces in the world, has often been criticized for the low quality of its labour supply. This paper critically examines the vocational training system and enterprise training provision in China. It analyses the role of the state and employers, and the main characteristics and problems in the training provision. The paper identifies the likely groups of workers missing out in the training network. It also contemplates the prospect of training in China against the context of its recent WTO accession, an increasing level of foreign investment in the country and, more importantly, its recent radical restructuring of the state-owned sectors and its rapid expansion of private sectors including the informal sector. development + Innovation + Economic development + Development perspectives and tendencies

Das sozialistische Innovationssystem der VR China unterschied sich grundsätzlich von den Innovationssystemen westlicher Industrieländer. Angesichts des einsetzenden dynamischen wirtschaftlichen Aufschwungs und um ein auf Wissen basierendes Wirtschaftssystem zu schaffen, stand die chinesische Regierung vor der Herausforderung, dieses Innovationssystem entsprechend den Bedingungen der Marktwirtschaft umzustrukturieren. Dabei gelang es ihr, das darin bereits vorhandene Wissen und Potenzial zu nutzen und so die Transformationskosten zu verringern. Diese Arbeit stellt u.a. die folgenden Fragen: Wie und in welchem Maße hat sich das chinesische Innovationssystem verändert? Welche Erfahrungen hat China dabei gemacht? Was sind die Charakteristika des gegenwärtigen Innovationssystems und wo liegen seine Probleme? Wo steht es im internationalen Vergleich? Welche Empfehlungen für seine weitere Entwicklung können gegeben werden? Zur Beantwortung dieser Fragen wurde umfangreiche empirische Forschung in der Informations- und Elektronikindustrie in Qingdao (Provinz Shandong) betrieben. Dieses Buch gibt damit erstmals ein umfassendes Bild des chinesischen Innovationssystems und seiner Leistungsfähigkeit. (Ifa/DÜI)

Khan, Haider A.

Innovation and growth : A Schumpeterian model of innovation applied to Taiwan

in: Oxford Development Studies (Basingstoke). 30 (2002) 3, S. 289-306

Taiwan + Elektronikindustrie + Innovation + Wirtschaftswachstum + Technologie + Forschung und Entwicklung

Taiwan + Electronics industry + Innovation + Economic growth + Technological science + Research and development

Following Schumpeter, we assume that innovation in specific firms, or groups of firms, can have economy-wide effects. Models based on this idea can be shown to have multiple equilibria. The idea of a positive feedback loop innovation system, or POLIS, is formalized by picking an appropriate sequence of equilibria over time. It is shown that POLIS has empirical relevance by applying the formal model to an actual economy. The 1997-98 financial crisis in many Asian countries, most notably South Korea, seemed to have reversed the conventional wisdom regarding the "East Asian miracle". This paper applies the concept of a POLIS to the case of Taiwan. (DSE/DÜI)

Singapore + Irish Republic + International/ country comparison + Economic development + Economic policy + Economic growth + Corporate identity + Knowledge-based economy + Further higher education + Information and communication technology + Global economic interdependence/ globalization

Ireland and Singapore have many striking similarities despite varying political ethos and culture. Both economies are striving toward a knowledge-based economy based on information communication technology in a highly globalized context. Both have been ranked as the top globalizer - Ireland in 2001 and Singapore in 2000 by AT Kearney in Foreign Policy Magazine. In terms of sustainability for economic growth and development, both economies recognize the critical role of their local enterprises and indigenous industry in general and entrepreneurship in innovative and creative activities, in particular. Both Ireland and Singapore, as developmental states, have favourable government intervention including the all-important aspect in human resources development and entrepreneurship education and training at the university level in pursuit of sustainable growth. Faced with a more competitive and highly volatile global economy, the two may learn lessons from each other and share experiences with other economies in their respective regions on entrepreneurship or enterprise development. In attempting some model comparison, this paper looks into the prospect of some generic entrepreneurship developmental model as a template in the first instance, subject to idiosyncratic socio-political features of individual countries. Case studies + Pest control

This essay outlines some of the benefits and challenges of implementing strategic knowledge management systems in small and medium-sized enterprises (SMEs) with reference to respective initiatives in the Republic of Singapore. The article addresses following research questions: What is knowledge management (KM) and why has it become an issue? How can SMEs benefit from strategic KM? What are the potential pitfalls of KM applications in small firms? What are the strategic imperatives of using KM in SMEs? Do small and large firms require different KM systems? What are the critical success factors which have to be considered during implementation? How do smart and KM-enabled SMEs look in reality? Some of these issues will be illustrated by a case-study of a small intelligent pest control firm in Singapore whose owners made effective use of development grants provided by government agencies tasked with the transformation of Singapore's small business sector in line with official IT-related development blueprints. Since the 1980s, the Government of this dynamic city-state in Southeast Asia has implemented several policy measures to realize the vision of an "intelligent island" aimed at remaining relevant in the global knowledge-based economy. Dilemmas of a proactive human resource development policy in Malaysia / Daniel Fleming ; Henrik Soborg

in: The European Journal of Development Research (Ilford). 14 (2002) 1, S. 145-170

Malaysia + Humankapital + Wirtschaftliche Entwicklung + Ausbildung/ Berufliche Bildung + Bildungsökonomie

Malaysia + Human capital + Economic development + Professional/

vocational education + Education economics

The Malaysian economy is moving towards more knowledge-intensive forms of production. The government is attempting to pursue a very proactive policy in this transition. The authors argue that the growth of a knowledge economy sets corresponding demands for change on institutional preconditions and new challenges, especially with regard to the need for reflexive governance. This analysis examines how the government provides institutional support to skill and human resource development for more knowledge-intensive production. (DSE/DÜI)

Socio-economic development + Brain drain

Seit Beginn der Reform- und Öffnungspolitik misst die chinesische Regierung den im Ausland ausgebildeten Studenten und Akademikern eine bedeutende Rolle für die sozioökonomische Entwicklung des Landes bei. So wurden nach jahrzehntelanger Isolierung 1978 erstmals wieder chinesische Studenten in großer Zahl zum Studium auch ins westliche Ausland geschickt. Das vordringliche Ziel bestand in einem selektiven Wissens- und Technologietransfer zur Umsetzung der ehrgeizigen Modernisierungspläne des Landes. Schon nach kurzer Zeit wurden die Erfolge und Beiträge der aus dem Ausland zurückgekehrten Studenten gefeiert. Wie bereits zu Zeiten der ersten Welle Auslandsstudenten im späten 19. und frühen 20. Jahrhundert, übernahmen auch jetzt wieder viele der Rückkehrer einflussreiche Positionen in Wirtschaft und Verwaltung sowie in Hochschulen und Forschungsinstituten. Im Mittelpunkt des Erkenntnisinteresses des Artikels steht die Frage, welche Maßnahmen die Anreizpolitik der chinesischen Regierung in den letzten Jahren bestimmen und welche Auswirkungen sie haben. property + New products + New production processes + Intellectual
property law + Patents + Electronics industry

Widely famous for its economic dynamism, ASEAN is not well known as a region of intellectual property creation. Patented assets owned by regional entities have remained very small in volume, notwithstanding the fast-paced, electronics-based transformation in regional production and trade from the 1990s. This is a matter for significant concern because inventions and innovations are the foundation of durable comparative advantage, higher value addition, and high value-added activities. Inevitably, the technological creativity and capabilities of ASEAN have to be shifted upwards for better synergy with the greatly intensified global competition, the accelerating technological progress, the more sophisticated and exacting market requirements, and the stronger and broader protection of intellectual property rights. The transition process will be highly demanding on resources, imagination, and perseverance, not least because capacity- and institutional-building requires lumpy investment, changed mindsets, and long periods of gestation. Nevertheless, the outstanding and speedy transformation in microelectronics capabilities among the East Asian developing economies gives grounds for guarded optimism as regards the prospects for transitional success among the miracle economies in Southeast Asia. This article promotes a "cultural international political economy" approach to globalization in East Asia in the so-called information age. It emphasizes the inherently discursive as well as material character of economic relations and their embedding in a complex web of different scales of action from local to global. Thus it introduces the policy discourses related to two major components in recent efforts to renew U.S. hegemony: promotion of the Global Information Infrastructure and the global expansion of intellectual property rights through the Trade-Related Intellectual Property Rights agreement. This initiative has enabled the emergence of a hegemonic GII-IPR-TRIPs complex supported by transnational informational capital, trade-related committees, and state agencies. This complex has triggered several forms of resistance and adaptation in East Asia. Targets of this resistance have been the Internet Corporation for Assigned Names and Numbers and the GII-IPR-TRIPs complex itself. Modes of counterhegemonic resistance have included

state strategic support for the Linux movement as well as everyday tactics of software piracy. In addition, subhegemonic forces (e.g., APEC and national governments) have been acting as translating centers that help shape responses to efforts to consolidate the hegemony of the GII-IPR-TRIPs complex at regional levels. (Crit Asian Stud/DÜI)

Ratification of international treaties + Course of negotiations + Putnam, Robert D. + Domestic determinants of foreign policy

Internationalen Abkommen bedürfen grundsätzlich der nationalen

Implementierung. In der theoretischen Literatur fanden Fragen der Implementierung jedoch traditionell wenig Aufmerksamkeit. In dem in diesem Beitrag entwickelten Modell wird unterstellt, dass Staaten im Rahmen internationaler Verhandlungen durchaus antizipieren, dass von Ihnen geschlossenen Verträge nur zum Teil umgesetzt werden. Im Wissen um die ausbleibende vollständige Implementierung wird Staaten somit ermöglicht, Zugeständnisse zu machen, die weit über die jeweiligen Präferenzen hinausgehen. Ein Beispiel für diese Erweiterung des traditionellen "two-level game"-Ansatzes zur Erklärung internationaler Verhandlungen findet sich in den Verhandlungen über Urheberrechte zwischen der VR China und den USA.
